Anatomy and Physiology

for
First Aiders

A Neil Pielou CEng BSc(Eng) MIEE ACGI

Neil Pielou trained and qualified in electrical engineering at Imperial College in London.

Whilst at the college, he joined the British Red Cross as a first aid volunteer. In over 27 years as a Red Cross volunteer, Neil has served as a first aider, as an emergency ambulance attendant and driver, and as a first aid trainer and accredited lecturer.

Acknowledgements

I am most grateful to the following people for their assistance in the production of this book:

The paramedic trainers from the NHS Ambulance Services, who give their time to teach enhanced first aid skills to Red Cross volunteers, and who provided the initial inspiration for this work,

Roger Serpell, and the members of Red Cross group L202 ('Imperial College'), for their support and encouragement in the creation of the first version,

Mike Reid and the members at Hammersmith & Fulham Red Cross Centre, London, for their support and encouragement in the creation of this version,

Sir Cameron Moffat KBE FRCS, Sir Peter Beale KBE FRCP, and Gwyn Thomas for checking the original drafts, and all the others - both professional and voluntary - who helped along the way,

Finally, to my wife Rosalind, for tolerating the long hours of study, writing, typing, and drawing, and for her support throughout the entire project.
